

## Ronda X / Armchair Design /

The Ronda X collection consists of a chair, an armchair and a stool. The structure is in iron tubular and the seat-back surface in hot-galvanized expanded metal. Nylon insoles. The sheet metal is made soft by the shape, which follows the curves of the body, and by the design that recalls a fabric, a lace. The armchair exploits modern technologies such as double curvature, which, while maintaining the simplicity of the single tubular for legs and armrests, makes it possible to amplify comfort with the armrest that extends to the body to support the elbow. The shape of the armrest recalls the curves of the backrest and the inclination towards the rear follows the ergonomics of the user. Thanks to the play of parallel tubulars and curves between the shell and the armrest, the enveloping character that distinguishes the armchair emerges. Pretreatment, cataphoresis, finishing with thermosetting powders.

### Description

Code: **458**

Typology: **Lounge Chairs**

Collection: **Ronda X**

Stackable: 8

Static Load: 200 Kg

### Technical Info

Width: **58 cm**

Depth: **62 cm**

Height: **83 cm**

Weight: **5.60 Kg**

Static Load: **200 Kg**

### Packaging

Packages: **1**

Pieces for pack: **4**

Dimensions: **101x73x65 cm**

Volume: **0.480 mc**

Polyethylene bag and cardboard box

### Materials

#### **Steel**

Iron and carbon alloy, with carbon content below 2%, treated to withstand the elements with the unique EMU-Coat anti-corrosion process.

**Maintenance:** To keep the product in good condition for a long time, we recommend storing it indoors and in a dry place during the winter to prevent condensate from forming. Before the winter and on a quarterly basis, if the products are kept near the sea, it is recommended to clean the metal surfaces with a soft cloth using water or detergent and protect them with Vaseline oil or car wax.

**Cushions for this collection:** C/457 Polyester cushion
